

CobaNitrox Xtended N-120-R

The novel surge baffle system is integrated in the mounting and absorbs emerging vibrations between fan and holder; this means that additional decoupling is no more necessary. Due to this novel surge baffle system the fitting dimensions rest unmodified, in order to permit assembling of every commercial 120mm holder.

Thus this smooth and ball bearing fan, which interacts with the integrated surge baffle system, guarantees minimal running noise.

The fan brackets are installable without screws and can be turned through 180°. So that it can be mounted not only to create a pushing airflow but also so to provide a pulling one.

Additionally the N-120-R comes with a modern colouring and a cool coloured LED-Fan.

Spezifikationen

Fan Dimension <small>(H/B/T)</small>	25/120/120mm
Fan Speed	1200U/min
Air Flow	90,1 cbm/h
Noise Level	19dBA
Rated Voltage	12V
Power Input	0,96W
Connector	3 Pin
Guarantee	24 month gurantee
Article-number	88885137
EAN-number	4260133122727
Weight (net)	100g
Weight (gross)	130g
Packing Units <small>(VE/VPE)</small>	1/60
Scope of Delivery	-
Features	LED Fan (red) Rotatable coloured rubber holder Screwless mounting
